We bring high-tech to your car.

Performance for a wide range of vehicles.

Technical highlights:

The new generation of Green Chili™ brings the newest and most advanced compounding technologies to the Eco tyre line:

Maximum fuel efficiency thanks to improved component geometry and efficient silica distribution. The EcoContact™ 6 strikes an optimal balance between tyre size and component distribution. The high-tech compound provides robust connections between the silica and the rubber. This allows an optimal adaptation to varying road conditions, which ultimately improves the tyre's rolling resistance and fuel consumption.

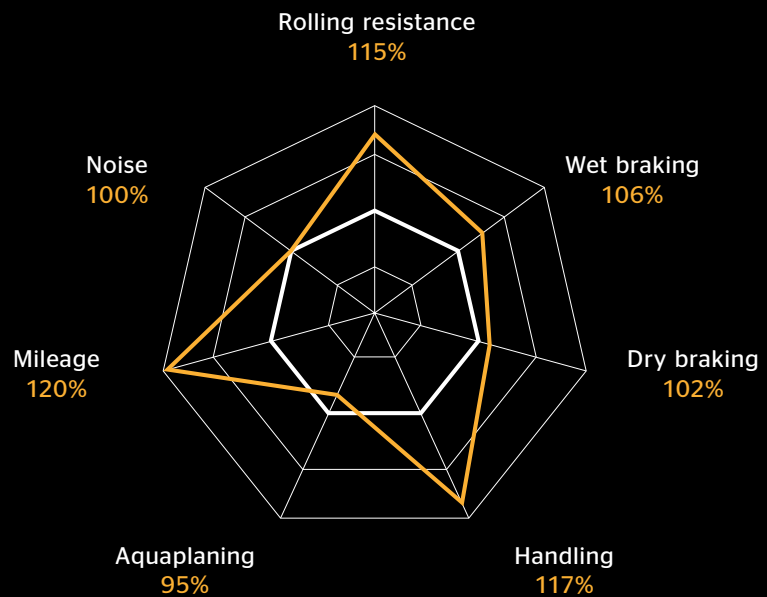

Enhanced mileage due to the new Green Chili™ 2.0 compound. The advanced Green Chili™ 2.0 compound adapts to the road surface, which leads to a reduction in the rubber loss throughout its life cycle. As a result, mileage is increased.

Optimised grip and handling experience. The EcoContact™ 6 offers a tailor-made pattern, resulting in the best compromise between dry and wet performance. It further increases the safety in handling situations such as lane changes. And due to its innovative asymmetric rib and sipe geometry, the tyre always keeps the contact with the road.

Tyre performance:

- EcoContact™ 6
- ContiEcoContact™ 5 = 100%

Tyre dimensions:

Tyre width in mm	Tyre cross section	Rim size in inches	Speed symbol
145-315	Series 30-80	13-22	T-Y
